Subject: SCC meeting 17/18-02-2011; agenda item 12; issues of common MS interest; (update and clarification of publication of title and references of ETAGs in OJ in the light of CPR)

Dear Georgios!

At the moment we have 2 categories of ETAGs (those mentioned in the OJ and others not). This leads to an ambiguity as the legal status is concerned. Manufacturers cannot understand this differentiation. In letters to the national administrations on the publication of ETAGs the Commission Services (CS) regularly declared its intention to publish the references of ETAGs in the OJ. Such a phrase was omitted in recent letters to the MS in this context.

Austria would find it very useful to have an updated consolidated list of references of ETAGs in the OJ. Austria therefore would like to ask the CS to inform the SCC on the further handling of this issue, also in the light of the transitional provisions of the future CPR (Articles 66.3 and 24.3)

Mit freundlichen Grüßen/Yours Sincerely

Josef Karner
