

## **GROUP OF NOTIFIED BODIES UNDER COUNCIL DIRECTIVE 89/106/EEC**

### **Report for the period from December 2012 to February 2013**

## **1 Introduction**

The aim of this report is to give SCC an overview of the work of the Group of Notified Bodies for the CPD (GNB-CPD) for the period concerned, and at the same time to highlight specific issues in which SCC may have a particular interest and/or for which GNB-CPD may be seeking a view.

This reporting period covers only three months, reflecting the shorter than usual interval between SCC meetings. The Advisory Group (AG) of the GNB-CPD has not met during this reporting period, although a meeting is scheduled for 20 March 2013, shortly before the SCC meeting. Six meetings of sector groups (SGs) have been held, and two more are scheduled to take place before the SCC meeting.

During this period the GNB-CPD was represented at the “Article 54” meeting for ‘*Exchange of Information among Notifying Authorities*’, 04 December 2012, Brussels.

## **2 Sector Groups - General activity**

The majority of the 23 GNB-CPD SGs continue to be active, discussing the implementation of harmonized technical specifications within their scopes, the implications for notified bodies of the Construction Products Regulation and the drafting of position papers where further guidance is required to work equivalent. To date 92 current SG position papers are published in NANDO and on CIRCABC. SGs and their working groups hold a total of about 20 meetings per year, in addition to work between meetings carried out on CIRCABC. The frequency of SG meetings seems to have increased during the last year as the CPR will soon come into force and SGs review the effects of the new Regulation on their work. All SGs have been requested to meet between July 2012 and June 2013, to consider any changes they should make for the CPR. The GNB Technical Secretariat has been calling meetings for the few SGs currently without a chairman. A couple of SG meetings have been cancelled due to a lack of interest but the intention is to announce another meeting before the CPR comes fully into force so that all SGs can have a chance to meet.

## **3 Continuing dissatisfaction with CIRCABC**

The GNB-CPD interest group has been hosted on CIRCABC since September 2012. However, CIRCABC continues to be less convenient than CIRCA in various ways, for example:

- It will only email notifications, not the newly uploaded documents. (It is thought that many members, once they had registered, relied principally on CIRCA emailing documents to them. This loss of functionality is a major concern for notified bodies due

to the time spent in logging-on to CIRCABC and downloading documents of interest. The extra time also increases notified bodies costs.)

- Its small pages split the contents of some folders over multiple pages.
- Navigation from one folder to another is much slower than with CIRCA.
- The search function does not seem to find usernames, the most basic and unambiguous way of identifying users, and the only identification given when checking the notification status of folders.

For a long time, there was a severe problem of CIRCABC frequently failing to email notifications of documents that have been uploaded. This problem seems to have abated this year, although it can still take a very long time for documents to appear in the “What’s New” page shown on logging in to the interest group. In February there was a spate of reports from users, particular AG members and SG officials, unable to access areas of our interest group, but these now seem to have been resolved.

CIRCABC is the primary medium for communication within the GNB-CPD, and this transfer to a more unreliable and less efficient platform than CIRCA has made it more difficult and more time-consuming for NBs, working on a voluntary basis, to coordinate their activities as required by CPR Article 55.

## **4 Preparations for the CPR**

### **4.1 Issues with the CPR requiring clarification by SCC or the Commission**

The GNB has developed a list of questions relating to the CPR and the transition from CPD to CPR, accompanied by answers which range from the GNB’s understanding or preference, to answers given by the Commission. The document was first issued as NB-CPD/11/469. It is revised and re-circulated periodically, and the latest version is NB-CPD/11/469r4. In the latest version, many of the answers are attributed to authoritative sources such as the Commission. (The panel discussions at the GNB-CPD Conference on the CPR, 18 October 2012, Brussels were particularly helpful in generating authoritative answers to some of the most important questions). However, new questions continue to arise and be added. It is hoped that the Commission’s FAQ document will answer most of the outstanding questions, but until a first edition is published, it is not possible to know which additional questions should be flagged to the Commission as being important.

### **4.2 Concerns regarding progress on notification to the CPR**

NBs are concerned that many details relating to how the CPR should be interpreted remain unclear. However, the issue causing the greatest concern by far is the slow progress towards accreditation and notification. It is important for NBs that:

- the requirements for their accreditation should be appropriate for their work, and;
- the accreditation (or notification) procedures should be co-ordinated and applied with equivalent rigour across all Member States, and;
- absolutely vital that there should be no procedural obstacles preventing them from becoming notified in appropriate areas by 1 July 2013.

But the time remaining before NBs must be notified to the CPR is now very short compared to the normal cycle of accreditation, surveillance and reassessment. It is encouraging that the national Notifying Authorities are co-ordinating their approaches. But the burden of work for accreditation bodies to complete in time is beginning to look insurmountable in a number of Member States.

## **5 Misleading allocation of responsibilities for cumulative AoC/AVCP systems in Annex ZAs**

NBs concerns that for most current harmonised standards that include cumulative attestation of conformity or assessment and verification of constancy of performance (AoC/AVCP) systems, the Annex ZAs (usually Table ZA.3) do not allocate certification responsibilities in accordance with CONSTRUCT 06/761, were raised at the GNB-CPD Conference on the CPR. But at the Conference, CEN and Commission officials seemed reluctant to accept that significant problems existed. The same issue was discussed the following day at the GNB-CPD AG meeting, and Mr Ascensao asked for example of standards that did not. CPD TechSec sent an analysis of a selection of standards with cumulative attestation to CEN, and the GNB hopes this will lead to a precise, accurate allocation of responsibilities (for example, requiring certification only for essential characteristics at systems 1+, 1 or 2+) in future versions of standards.

NOTE 1 Development stage X with text struck through indicates a superseded version of a document.

NOTE 2 Development stage Y with text struck through indicates a paper on which development has ceased, for instance because the objective of a SG PP has been incorporated in a modified version of a standard. (However, papers on which development has ceased were not retained in this document before 2008.)

NOTE 3 Development stage Z with text struck through indicates a paper which was published but has since been withdrawn.

NOTE 4 These totals count the latest published version of documents, and additionally revisions under way, but superseded versions of documents are not included. There may be some double counting between one or two SH02 documents and those in the vertical SGs.
